Chennai, India — Open to Hybrid / Remote

Professional Summary

Results-driven Full Stack Engineer and M.E. Computer Science student at SSN College of Engineering (CGPA 9.09/10) with a strong foundation in designing scalable, production-grade web applications. Hands-on experience building RESTful APIs, database-backed services, and responsive frontends using React.js, Next.js, Node.js, and MongoDB. Skilled in deep learning, NLP, and multimodal AI systems. Recognized across multiple national hackathons including IIT Madras and IEEE Madras. Seeking a Software / Full Stack / Backend Engineering role to contribute to high-impact, real-world products.

Education

M.E. Computer Science & Engineering — SSN College of Engineering, Chennai

Jul 2025 – Present

CGPA: 9.09 / 10

B.Tech Information Technology — Chennai Institute of Technology, Chennai

Jun 2021 – May 2025

CGPA: 8.69 / 10

Experience

Backend Engineer Intern — NKINFYX GROUPS Pvt. Ltd. (FYXIN Division), Pondicherry

2024

Project: ERP Application for a Large Finance Enterprise

- Integrated 10 or more core ERP modules by building and maintaining RESTful APIs with payload validation, data-flow management, and module-level integration.
- Reduced average query response time by 35% through optimized database schema design focused on entity relationships and query performance.
- Increased overall application reliability by 20% by implementing server-side business-rule processing and workflow validations.
- Resolved 50 or more bugs through systematic functional testing and debugging, improving sprint-release stability across 6 two-week sprints.
- Delivered 100% of planned backend features on schedule by authoring technical documentation and maintaining consistent agile sprint velocity.

Key Projects

AI-Based Deepfake Detection – Insurance Fraud Prevention

Feb – Mar 2026

Python · TensorFlow · OpenCV · CNN/GAN · Flask · Deep Learning

- Achieved 94% detection accuracy on manipulated insurance-claim media by constructing a CNN/GAN deep learning pipeline with transfer learning.
- Reduced manual claim review time by 60% by automating preprocessing, feature extraction, and fraud-scoring; validated across 500 claims during testing.
- Delivered inference latency under 300 ms per request by deploying a Flask REST endpoint for real-time fraud prediction.
- Cut contributor onboarding time by 40% by designing a modular, production-ready codebase with separate pipelines for training, evaluation, and inference.

Multimodal Mental Health Risk Detection

Aug – Sep 2025

Python · PyTorch · BERT · ResNet · Audio Spectrograms · Gradio

- Attained 87% classification accuracy by engineering a multimodal ML pipeline fusing text (BERT NLP), image (ResNet CNN), and audio (spectrogram) inputs into a unified risk score.
- Achieved response time under 200 ms per live inference by shipping an interactive Gradio web application for clinical demonstration and research use.
- Reduced iteration cycle by 30% by structuring the codebase into separated modules for feature extraction, model training, inference, and visualization.

Developer Portfolio Website

Dec 2025 – Jan 2026

React.js · HTML5 · CSS3 · JavaScript · Vercel · GitHub Pages

- Scored 95 on Lighthouse performance by launching a fully responsive personal portfolio, achieving cross-device compatibility across desktop and mobile.
- Increased professional outreach by 3 times by integrating interactive UI animations, project demos, GitHub repository links, and a functional contact form.
- Maintained zero-downtime deployments by configuring Vercel with automated CI/CD from GitHub for every code push.

Technical Skills

Languages:	Python, JavaScript (ES6+), Java, C, C++, R, HTML5, CSS3, PHP
Frontend:	React.js, Next.js, Vue.js, Tailwind CSS, Responsive Design, Web Animations
Backend:	Node.js, Express.js, Spring Boot, RESTful APIs, GraphQL, Microservices
Databases:	MongoDB, PostgreSQL, MySQL, Apache Cassandra, Neo4j, Apache Kafka, Hadoop, Apache Spark
AI / ML:	TensorFlow, PyTorch, BERT/Transformers, CNNs, GANs, NLP, Model Fine-Tuning, OpenCV
DevOps & Tools:	Git, Docker, CI/CD Pipelines, Linux, Postman, VS Code, Agile/Scrum, SDN

Achievements

- Top 8 Finalist — IIT Madras Hackathon: Selected among top 8 teams nationally for technical excellence and innovation.
- Top 9 Finalist — IEEE Madras Section 24-Hour Hackathon: Recognized for high-impact engineering solution under time-constrained competition.
- 2nd Runner-Up — Smart India Hackathon 2022 (Intercollege): Delivered a scalable real-world tech solution among hundreds of competing teams.
- Top 20 Finalist — Build-A-Thon 2023: Recognized for product-oriented, high-impact solution development.
- Participant — TCS India Hackathon 2022 & Hero Campus Challenge Season 8: Contributed to industry-scale engineering challenges.
- Solved 1000 SkillRack problems and 300 LeetCode problems, demonstrating strong command of Data Structures, Algorithms, and competitive programming.

Leadership & Organizations

President — TROJANS, Chennai Institute of Technology

Sep 2024 – Apr 2025

- Coordinated 12 committees and 2500 participants from colleges across Tamil Nadu as President of a National-Level Technical Symposium.
- Managed end-to-end event logistics, budgeting, and stakeholder communications, strengthening strategic planning and cross-functional team leadership.

Certifications

- IBM AI Engineering Professional Certificate — Coursera
- Cybersecurity Essentials — Cisco Networking Academy
- Foundations of Cybersecurity — Google (Coursera)
- The Ultimate Web Development Bootcamp — Udemy
